Groundhog With 'Three Ears'

David Spiggle, helping to survey some land last week in the northeastern section of the town of Appomattox, took time out to shoot a groundhog for the landowner. When he picked up the dead animal he saw what appeared to be a third "ear"—an ear-like projection just in front of what probably was his "working ear." Spiggle is using a card to separate the two "ears" in the photo above.

Heroes of the World Series by Al Silverman – From Christy Mathewson to Sandy Koufax with stops in between for Casey Stengel, Babe Ruth, Dizzy Dean Billy Martin, Dusty Rhodes, Don Larsen ... the dramatic stories of the all-time greatest performers in America's greatest sports spectacle, major league baseball.

The Magnificent Mutineers by Earle Miers – When A/1 Levy of Easttown, Pennsulvania, went off to fight the British with "Mad Anthony" Wayne, he had no idea what was in store for him: love for a beautiful girl; a hazardous time as a spy in New York; narrow escapes in lonely places. But there was another side to the coin in being a soldier in the Pennsylvania line during the American Revolution. Author Miers vividly describes the misery and starvation of the troops in Morristown, New Jersey, that led to one of the dramatic events of the Revolution – the mutiny of men who had been pressed beyond human endurance.

Farmers To Certify Acreage

Early certification by Appomattox County farmers in the voluntary farm programs will mean earlier program payments, according to J. F. Alvis, Jr., Chairman of the Appomattox County Agricultural Stabilization and Conservation (ASC) Committee.

Certification must be made by the disposition date(s) of: June 1 for wheat and barley and June 30, for corn, grain sorghum, fire-cured, flue-cured and sun-cured tobacco. When certification is made earlier, the certification date becomes the final farm disposition date.

Mr. Alvis cautioned farmers against guesswork. He advised that they must know their exact acreage of feed grain, wheat, fire-cured, flue-cured and sun-cured tobacco. They must also know the acreage diverted from wheat and feed grains, and that they have met their farms' conserving base requirements.

When a farmer certifies his compliance with the feed grain and wheat program provisions, the County ASCS Office begins processing the papers so that he will receive full payment as soon as possible after July 1. Target date for completion of 1970 farm program payments is July and August.

The Chairman reminded farmers of the following major points involved in certifying they are in compliance with the farm programs:

Certification must be exact. Spot checks may be made at any time following certification. After certification, adjustments cannot be made to bring acreage into compliance.

Finish planting before making certification, Mr. Alvis said. Be sure the allotment, base, or permitted acreage has not been exceeded on all farms in which the farmer or his immediate family has an interest.

Census Asks 'Were You Counted?'

Were you counted in Census '70?

With the 1970 Census of Population and Housing virtually completed locally, District manager Barbara R. Aldridge announced the beginning of a "Were You Counted?" campaign to insure that no resident of the area has been overlooked.

If you think you or your family might have been missed, you are urged to notify the census district office by means of a "Were You Counted?" form. Area newspapers are printing these forms in their current editions as a public service. Prompt mailingof the "Were You Counted?" forms will speed up the compilation of preliminary population figures for the area.

Sighted Three – Shot One!

The slogan used to be "a chicken in every pot", but in Appomattox, if you're a good hunter you can have not one but two turkeys for the freezer or oven. At least that's the way it is for Jesse H. Johnson, who bagged this 15 pound gobbler Tuesday morning, his second turkey for the season. He killed two deer in the fall, and said his turkey caller brought three within gun range Tuesday.
